

18.09.2023, Monday

SUBJECT: KKDİK (Registration, Evaluation, Permit and Restriction of Chemicals) Regulation

Dear Supplier,

The Turkish Ministry of Environment and Urbanization published a new regulation named KKDİK (Registration, Evaluation, Permit and Restriction of Chemicals) Regulation on 31 December 2017.

According to this important regulation, it is mandatory for chemical substances imported or produced in amounts of 1 Metric Ton or more per year in Türkiye must be registered within the KKDİK system.

Chemical substances whose KKDİK registration has not been completed as of 01.01.2024 cannot be produced or imported until the registration process is completed.

In this context, chemical products you produce or export to supply us must be registered into the KKDİK system.

We kindly request you to complete the registration process to the KKDİK system by 31.12.2023 at the latest. After registration is complete, we encourage you to share the relevant declaration application with us by sending it to niv.asa@frimpeks.com and purchasing@frimpeks.com.

Furthermore, after you receive this document, we would like to inform you that you should only supply us with KKDİK-registered products.

Best regards,

☎ +90 (212) 867 10 00
